14th November 2019

TICKETS

Members: £249.00

Standard: £322.00

Book your tickets early to receive
an additional 10% discount.

Member companies booking 1 or
more tickets can **bring 1**
additional delegate absolutely
free of charge

Tickets can be booked online at
www.bga.org.uk or by emailing
admin@bga.org.uk

The British Gear Association is the UK Centre of Technical Excellence for gear design, manufacture & application technologies. The Annual Technical Awareness Event is the leading conference for the Gear Industry in the UK and this long running seminar is considered an essential event for manufacturers, distributors and academics involved in the UK Gears Industry.

Gears 2019 provides an outstanding forum to generate discussion and share ideas with others on all aspects of power transmission technology, commercial interests and the future of manufacture within the UK.

In addition to the **cutting edge lectures and speeches from pre-eminent experts** there will be plenty of opportunity to **network** with the leading Gear companies, manufacturers, distributors and academics. This will be your chance to share opportunities, discuss challenges and promote your interests to like minded people.

This year we are delighted to be holding this prestigious event at Renishaw PLC. Renishaw has cutting edge conferencing facilities and are **offering an onsite tour** of their manufacturing facility for Gears 2019 delegates

Papers being presented include:

"Predicting Oil Distribution and Churning Losses in the Torque Vectoring P1227F ILEV Transmission" – Xtrac.

"The design and simulation of the Orbitless gear system – a new, innovative approach to gearing." – Romax Technology.

"Design and test results of an adjustable centres back-to-back gear test rig" – Cummins

"A new method of monitoring gearboxes; Smart Oil Plug - a wireless solution" – Transmission Dynamics.
